

PG & RESEARCH DEPARTMENT OF BOTANY

B. Sc., BOTANY SYLLABUS

(TANSCHÉ)

(FROM THE ACADEMIC YEAR 2023-2024)

H.H. THE RAJAH'S COLLEGE (AUTONOMOUS)

PUDUKKOTTAI – 622 001

B. Sc. BOTANY PROGRAMME – Course Structure under CBCS Pattern
(For the candidates admitted from the academic year 2018-2019 onwards)

Sl. No	Sem	Sub.Code	Paper	Hrs/ Week	Credit	Exam Hrs.	Marks

LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME	
Programme:	B.Sc. BOTANY
Programme Code:	UBT
Duration:	3 Years (UG)
Programme Outcomes:	<p>PO1: Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study</p> <p>PO2: Communication Skills: Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one's views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.</p> <p>PO3: Critical thinking: Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p>PO4: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one's learning to real life situations.</p> <p>PO5: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples,</p>

	<p>and addressing opposing viewpoints.</p> <p>PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesizing and articulating; Ability to recognize cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation</p> <p>PO7: Cooperation/Team work: Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team</p> <p>PO8: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.</p> <p>PO9: Reflective thinking: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.</p> <p>PO10 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.</p> <p>PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.</p> <p>PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.</p> <p>PO 13: Moral and ethical awareness/reasoning: Ability to embrace moral/ethical values in conducting one's life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one's work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.</p> <p>PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.</p> <p>PO 15: Lifelong learning: Ability to acquire knowledge and skills, including „learning how to learn“, that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.</p>
Programme Specific Outcomes:	<p>On successful completion of Bachelor of Physics with Computer Applications programme, the student should be able to:</p> <p>PSO1: Disciplinary Knowledge: Understand the fundamental principles, concepts, and theories related to physics and computer science. Also, exhibit proficiency in performing experiments in the laboratory.</p>

	<p>PSO2: Critical Thinking: Analyse complex problems, evaluate information, synthesize information, apply theoretical concepts to practical situations, identify assumptions and biases, make informed decisions and communicate effectively</p> <p>PSO3: Problem Solving: Employ theoretical concepts and critical reasoning ability with physical, mathematical and technical skills to solve problems, acquire data, analyze their physical significance and explore new design possibilities.</p> <p>PSO4: Analytical & Scientific Reasoning: Apply scientific methods, collect and analyse data, test hypotheses, evaluate evidence, apply statistical techniques and use computational models.</p> <p>PSO5: Research related skills: Formulate research questions, conduct literature reviews, design and execute research studies, communicate research findings and collaborate in research projects.</p> <p>PSO6: Self-directed & Lifelong Learning: Set learning goals, manage their own learning, reflect on their learning, adapt to new contexts, seek out new knowledge, collaborate with others and to continuously improve their skills and knowledge, through ongoing learning and professional development, and contribute to the growth and development of their field.</p>

2. Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations, sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising statistical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced statistical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Statistics based problem solving skills are included as mandatory components in the 'Training for Competitive Examinations' course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Statistical Quality Control course is included to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest DBMS and Computer software for Analytics.

Value additions in the Revamped Curriculum:

Semester	Newly introduced Components	Outcome / Benefits
I	Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning abstract Statistics and simulating mathematical concepts to real world.	<ul style="list-style-type: none"> • Instil confidence among students • Create interest for the subject
I, II, III, IV	Skill Enhancement papers (Discipline centric / Generic / Entrepreneurial)	<ul style="list-style-type: none"> • Industry ready graduates • Skilled human resource • Students are equipped with essential skills to make them employable
		<ul style="list-style-type: none"> • Training on Computing / Computational skills enable the students gain knowledge and exposure on latest computational aspects
		<ul style="list-style-type: none"> • Data analytical skills will enable students gain internships, apprenticeships, field work involving data collection, compilation, analysis etc.
		<ul style="list-style-type: none"> • Entrepreneurial skill training will provide an opportunity for independent livelihood • Generates self – employment • Create small scale entrepreneurs • Training to girls leads to women empowerment
		<ul style="list-style-type: none"> • Discipline centric skill will improve the Technical knowhow of solving real life problems using ICT tools
III, IV, V & VI	Elective papers- An open choice of topics categorized under Generic and Discipline Centric	<ul style="list-style-type: none"> • Strengthening the domain knowledge • Introducing the stakeholders to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature • Students are exposed to Latest topics on Computer Science / IT, that require strong statistical background • Emerging topics in higher education / industry / communication network / health sector etc. are

		introduced with hands-on-training, facilitates designing of statistical models in the respective sectors
IV	DBMS and Programming skill, Biostatistics, Statistical Quality Control, Official Statistics, Operations Research	<ul style="list-style-type: none"> • Exposure to industry moulds students into solution providers • Generates Industry ready graduates • Employment opportunities enhanced
II year Vacation activity	Internship / Industrial Training	<ul style="list-style-type: none"> • Practical training at the Industry/ Banking Sector / Private/ Public sector organizations / Educational institutions, enable the students gain professional experience and also become responsible citizens.
V Semester	Project with Viva – voce	<ul style="list-style-type: none"> • Self-learning is enhanced • Application of the concept to real situation is conceived resulting in tangible outcome
VI Semester	Introduction of Professional Competency component	<ul style="list-style-type: none"> • Curriculum design accommodates all category of learners; ‘Statistics for Advanced Explain’ component will comprise of advanced topics in Statistics and allied fields, for those in the peer group / aspiring researchers; • ‘Training for Competitive Examinations’ –caters to the needs of the aspirants towards most sought - after services of the nation viz, UPSC, ISS, CDS, NDA, Banking Services, CAT, TNPSC group services, etc.
Extra Credits: For Advanced Learners / Honors degree		<ul style="list-style-type: none"> • To cater to the needs of peer learners / research aspirants

Skills acquired from the Courses	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Total – 140 Credits																	

Methods of Evaluation Theory		
Internal Evaluation	Continuous Internal Assessment Test	25 Marks
	Assignments	
	Seminars	
	Attendance and Class Participation	
External Evaluation	End Semester Examination	75 Marks
	Total	100 Marks
Methods of Evaluation Practicals		
	Continuous Internal Assessment Test	40 Marks
	Attendance and Class Participation	
External Evaluation	End Semester Examination	60 Marks
	Record	
	Total	100 Marks
Methods of Assessment		
Recall (K1)	Simple definitions, MCQ, Recall steps, Concept definitions	
Understand/ Comprehend (K2)	MCQ, True/False, Short essays, Concept explanations, Short summary or overview	
Application (K3)	Suggest idea/concept with examples, Suggest formulae, Solve problems, Observe, Explain	
Analyze (K4)	Problem-solving questions, Finish a procedure in many steps, Differentiate between various ideas, Map knowledge	
Evaluate (K5)	Longer essay/ Evaluation essay, Critique or justify with pros and cons	
Create (K6)	Check knowledge in specific or offbeat situations, Discussion, Debating or Presentations	

In order to avoid pull the score down of each PO, it is suggested that the usage L-Low (1) to the minimum.

The S, M, L is based on the Course outcomes. The mapping is based on the revised Bloom's Taxonomy Verbs used to describe your Course outcomes.

- Remember and Understanding – Lower level
- Apply and Analyze – Medium Level
- Evaluate and Create – Strong Level

CORE-I PLANT DIVERSITY I ALGAE

Title of the Course		PLANT DIVERSITY I ALGAE					
Paper Number		CORE I					
Category	Core	Year	I	Credits	4	Course Code	23UBT1
		Semester	I				
Instructional Hours per week		Lecture	Tutorial		Lab Practice	Total	
		3	2		--	5	
Pre-requisite		Students should be familiar with the basics of different classes of algae.					
Learning Objectives							
C1	To provide a comprehensive knowledge on the biology of algae.						
C2	To provide a basis for better understanding of the evolution higher of plants.						
C3	To understand reproductive biology, ecology of plants by studying the simpler systems in algae.						
C4	To understand the role of algae in ecosystems as primary producers of nutrition.						
C5	To understand importance of algae to animals and humans.						
Course outcomes	On completion of this course, students will;						
CO1	Relate to the structural organization, reproduction and significance of algae.						K1
CO2	Demonstrate knowledge in understanding the various life cycle patterns and the fundamental concepts in algal growth						K2
CO3	Explain the benefits of various algal technologies on the ecosystem.						K3
CO4	Compare and contrast the thallus organization and modes of reproduction in algae.						K4
CO5	Determine the emerging areas of Algal Biotechnology for identifying commercial potentials of algal products and their uses.						K5
UNIT	CONTENTS						
I	Classification (Fritsch-1935-1945), criteria for classification, algal distribution.						
II	Thallus organization (unicellular- <i>Chlorella</i> , Diatoms, colonial- <i>Volvox</i> , filamentous- <i>Anabaena</i> , <i>Oedogonium</i> , siphonous- <i>Caulerpa</i> , parenchymatous- <i>Sargassum</i> , <i>Gracilaria</i>).						
III	Reproduction-Vegetative, asexual, sexual reproduction and life histories (haplontic-, <i>Oedogonium</i> and <i>Chara</i> , diplontic-Diatoms and <i>Sargassum</i> , diplohaplontic- <i>Ulva</i> and diplobiontic- <i>Gracilaria</i>) (Examples may be changed according to the availability of the specimens).						
IV	Algal cultivation methods, Algal production systems; indoor cultivation methods and large-scale cultivation of algae, harvesting of algae.						

V	Algae as food and feed: Agar-agar, Alginic acid and Carrageenan; Diatomite. Resource potential of algae: Application of algae as fuel, agriculture and pharmaceutical. Phycoremediation. Role of algae in CO ₂ sequestration, Algae as indicator of water pollution, algal bioinoculants, Bioluminescence.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

CORE-II PLANT DIVERSITY I ALGAE - PRACTICAL-I

Title of the Course		PLANT DIVERSITY – I: ALGAE Practical I						
Paper Number		CORE II						
Category	Core	Year	I	Credits	3	Course Code	23UBT2P	
		Semester	I					
Instructional Hours per week		Lecture		Tutorial		Lab Practice		Total
		2		-		3		5
Pre-requisite		Students should be familiar with the basics of algae.						
Learning Objectives								
C1		To develop skills to identify algae based on habitat, thallus structure and the internal organization.						
C2		To identify microalgae in a mixture.						
C3		To develop skills to prepare the microslides of algae.						
C4		To study the economic importance of few species.						
C5		To understand importance of algae to animals and humans						
Course outcomes: On completion of this course, the students will be able to CO		Programme outcomes						
CO1 Recall and identify algae using key identification characters.		K1						
CO2 Demonstrate practical skills in preparation of fresh mount and identification of algal forms		K2						

from algal mixture.	
CO3 Describe the internal structure of algae prescribed in the syllabus	K3
CO4 Decipher the algal diversity in fresh/marine water and their economic significance.	K4
CO5 Evaluate the various techniques used to culture algae for commercial purposes	K5
EXPERIMENTS	
1. Micro-preparation of the types prescribed in the syllabus. 2. Identifying the micro slides relevant to the syllabus. 3. Identifying types of algal mixture. 4. Economic importance of Algae as: (i) Food (ii) Feed (iii) Biofertilizers (iv) Seaweed liquid fertilizer (v) Hydrogen production by algae (vi) SCP (vii) Agar Agar (viii) Alginate (ix) Diatomaceous earth. 5. Field visit to study fresh water/marine water algal habitats. 6. Visit to nearby industry actively engaged in algal technology.	
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

FOUNDATION COURSE FOR BOTANY

BASICS OF BOTANY

Title of the Course		BASICS OF BOTANY					
Paper Number		Foundation Course					
Category	Elective	Year	I	Credits	1	Course Code	23UBTSE F1
		Semester	I				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		2		-	-	2	
Pre-requisite		To recall the students about the basic aspects of botany.					
Learning Objectives							
C1	To learn about the classification, distinguishing traits, geographic distribution, and reproductive cycle of algae, fungi, lichens, and bryophytes.						
C2	To understand the biodiversity by describing and explaining the morphology and reproductive processes of algae, fungi, bryophytes and microorganisms.						
C3	To investigate the classification, distinctive traits, distribution and reproduction and life history of the various classes and major types of Pteridophytes and Gymnosperms.						
C4	Enable to learn various cell structures and functions of prokaryotes and eukaryotes and understand the salient features and functions of cellular organelles.						
C5	Understanding of laws of inheritance, genetic basis of loci and alleles.						
Course outcomes	Programme Outcomes						
On completion of this course, the students will be able to: CO							
1. Increase the awareness and appreciation of human friendly algae and their economic importance.	K1						
2.Develop an understanding	K2						

of microbes and fungi and appreciate their adaptive strategies	
3. Develop critical understanding on morphology, anatomy and reproduction of Bryophytes, Pteridophytes and Gymnosperms.	K3
4. Compare the structure and function of cells and explain the development of cells.	K4
5. Understand the core concepts and fundamentals of plant biotechnology and genetic engineering.	K5

UNIT	CONTENTS
I	BIODIVERSITY Systematics : Two Kingdom and Five Kingdom systems - Salient features of various Plant Groups : Algae, Fungi, Bryophytes, Pteridophytes and Gymnosperms- Viruses - Bacteria.
II	CELL BIOLOGY Cell as the basic unit of life - Prokaryotic and Eukaryotic Cell (Plant Cell) - Light Microscope and Electron Microscope Ultra Structure of Prokaryotic and Eukaryotic Cells - Cell Wall - Cell Membrane Plastids, Ribosomes.
III	PLANT MORPHOLOGY Structure and Modification of Root, Stem and Leaf - Structure and Types of Inflorescences - Structure and Types of Flowers, Fruits and Seeds.

IV	GENETICS Concept of Heredity and Variation - Mendel's Laws of Inheritance.
V	PLANT PHYSIOLOGY Cell as a Physiological Unit : Water relations -Absorption and movement : Diffusion, Osmosis, Plasmolysis, Imbibition -Permeability, Water Potential - Transpiration - Movement - Mineral Nutrition
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

SEMESTER - II
CORE-III PLANT DIVERSITY II FUNGI, BACTERIA, VIRUSES, PLANT
PATHOLOGY AND LICHENS

Title of the Course		PLANT DIVERSITY – II: FUNGI, BACTERIA, VIRUSES, PLANT PATHOLOGY AND LICHENS					
Paper Number		CORE III					
Category	Core III	Year	I	Credits	4	Course Code	23UBT3
		Semester	II				
Instructional Hours per week		Lecture	Tutorial		Lab Practice	Total	
		3	2		--	5	
Pre-requisite		Students should be familiar with the basics of fungi, bacteria, viruses and lichens.					
Learning Objectives							
C1		To describe the common characteristics of fungi as being heterotrophic, unicellular/multicellular.					
C2		To understand the biology of fungi and to discuss the importance of fungi in various ecological roles					
C3		To understand lichen structure, function, identification, and ecology; Comprehend the events of symbiosis and lichenization and to demonstrate the use of lichens as bioindicator species.					
C4		To identify the main groups of plant pathogens, their symptoms.					
C5		To understand the various types of plant diseases.					
Course outcomes: On completion of this course, the students will be able to: CO		Programme outcomes					
1. Recognize the general characteristics of microbes, fungi and lichens and disease symptoms.		K1					
2. Develop an understanding of microbes, fungi and lichens and appreciate their adaptive strategies		K2					

based on structural organization.	
3. Identify the common plant diseases, according to geographical locations and device control measures.	K3
4. Analyze the emerging trends in fungal biotechnology with special reference to agricultural and pharmaceutical applications.	K4
5. Determine the economic importance of microbes, fungi and lichens.	K5
UNIT	EXPERIMENTS
I	FUNGI Classification of fungi - (Alexopoulos and Mims, 1979), criteria for classification, Characteristic features, thallus organization, mode of nutrition, structure, reproduction and life-history of classes, each with one suitable example: Zygomycotina (<i>Pilobolus</i> , <i>Mucor</i> , <i>Rhizopus</i>), Ascomycotina (<i>Aspergillus</i> , <i>Saccharomyces</i> <i>Peziza</i>), Basidiomycotina (<i>Agaricus</i> , <i>Pleurotus</i> , <i>Puccinia</i>) and Deuteromycotina (<i>Cercospora</i> , <i>Alternaria</i>). (Examples may be changed according to the availability of the specimens). Importance of mycorrhizal association.
II	ECONOMIC IMPORTANCE OF FUNGI: Cultivation of mushroom – <i>Pleurotus</i> (food). Fungi in agriculture application (biofertilizers): Mycotoxins (biopesticides), Production of industrially important products from fungi- alcohol (ethanol), organic acids (citric acid), enzymes (protease). Vitamins (Vitamin B-complex and Vitamin B-12), applications of fungi in pharmaceutical products (Penicillin). Importance of VAM fungi. Harmful effects of Fungi. Agriculture (Biofertilizers); Mycotoxins
III	BACTERIA, VIRUS: Classification (Bergey's, 1994), structure and reproduction of bacteria, Mycoplasma, Virology -Viruses general characters, structure and reproduction.

IV	<p>PLANT PATHOLOGY: General symptoms of plant diseases; Geographical distribution of diseases; Etiology; Host-Pathogen relationships; Disease cycle and environmental relation; prevention and control of the following plant diseases. General characters of Bacteria and Viruses.</p> <p>Bacterial diseases – Citrus canker and Bacterial wilt of Banana</p> <p>Viral diseases – Tobacco Mosaic and Vein clearing of Papaya</p> <p>Fungal diseases – Blast disease in rice and Tikka disease</p>
V	<p>LICHEN: Classification (Hale, 1969). Habitat, nature of association, Structure, Nature of Mycobionts and Phycobionts, Study of growth forms of lichens (crustose, foliose and fruticose), types, distribution, thallus organization, reproduction and ecological significance of lichens with special reference to <i>Usnea</i>.</p> <p>Economic importance of Lichens: food, fodder and nutrition, flavor, tanning and dyeing, cosmetics and perfumes, Brewing and distillation, minerals, Natural products, medicine (Ayurvedic, Siddha), pharmaceutical products, biodegradation agent, air pollution and biomonitoring, soil formation, nitrogen fixation, Harmful aspects, poison from lichens,</p>
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	<p>Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)</p>
Skills acquired from this course	<p>Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill</p>

**CORE-IV PLANT DIVERSITY II FUNGI, BACTERIA, VIRUSES, PATHOLOGY AND
LICHENS - PRACTICAL-II**

Title of the Course		PLANT DIVERSITY – I: FUNGI, BACTERIA, VIRUSES, PLANT PATHOLOGY AND LICHENS –Practical II						
Paper Number		CORE IV						
Category	Core	Year	I	Credits	3	Course Code	23UBT4P	
		Semester	II					
Instructional Hours per week		Lecture	Tutorial		Lab Practice		Total	
		2	-		3		5	
Pre-requisite		Students should be familiar with the basics of fungi and lichens.						
Learning Objectives								
C1	To enable students to identify microscopic and macroscopic fungi.							
C2	To prepare microslides of fungi and lichens.							
C3	To know the presence of pathogen inside the plant tissues through microscopic sections.							
C4	To identify the bryophytes based on the morphology, and microslides.							
C5	To know the economic importance of the microbes studied.							
Course outcomes On completion of this course, the students will be able to: CO	Programme Outcomes							
1. Identify microbes, fungi and lichens using key identifying characters	K1							
2. Develop practical skills for culturing and cultivation of fungi.	K2							
3. Identify and select suitable control measures for the common plant diseases.	K3							

4. Analyze the characteristics of microbes, fungi and plant pathogens	K4
5. Access the useful role of fungi in agriculture and pharmaceutical industry.	K5
<p>EXPERIMENTS</p> <ol style="list-style-type: none"> 1. Microscopic observation of vegetative and reproductive structures of types prescribed in the syllabus through temporary preparations and permanent slides. 2. Identifying the micro slides relevant to the syllabus. 3. Herbarium specimens of bacterial diseases/photograph. 3. Protocol for mushroom cultivation. 4. Inoculation techniques for fungal culture (Demonstration only). 5. Study of economically important products obtained from fungi: Fungal biofertilizers, biopesticides, biofungicide (<i>Trichoderma</i>), edible mushroom/Yeast, organic acids (citric acid) enzymes (protease), antibiotics and vitamins. 6. Mycorrhiza: ecto-mycorrhiza and endo-mycorrhiza (Photographs) 7. Visit to fungal biotechnology laboratories. 8. Ultra structure of bacteria. 9. Structure of bacteriophage. 10. Micro-preparation of <i>Usnea</i> to study vegetative and reproductive structures. 11. Identifying the micro slides relevant to the syllabus. 12. Study of thallus and reproductive structures (apothecium) through permanent slides. 13. Economic importance of Lichens - Dye and perfume.

SEMESTER - III
CORE-V PLANT DIVERSITY III -BRYOPHYTES, PTERIDOPHYTES,
GYMNOSPERMS, PALEOBOTANY AND EVOLUTION

Title of the Course		PLANT DIVERSITY-III BRYOPHYTES, PTERIDOPHYTES, GYMNOSPERMS, PALEOBOTANY AND EVOLUTION						
Paper Number		CORE IX						
Category	Core	Year	II	Credits	5	CourseCode	23UBT5	
		Semester	III					
Instructional Hours per week		Lecture		Tutorial		Lab Practice		Total
		3		-		2		5
Pre-requisite		Students should be familiar with the basics of Bryophytes, Pteridophytes, Gymnosperms, Fossil Records and Evolution.						
Learning Objectives								
C1		To enable the students to have an overview of Bryophytes.						
C2		To understand the morphological, evolution and economic importance of the Pteridophytes.						
C3		To enable to students to understand internal and reproductive structures of gymnosperms.						
C4		To acquaint students with evidences of paleobotany, types of fossils and geological timescale.						
C5		To understand the various theories of evolution.						
Course outcomes: On completion of this course, the students will be able to: CO		Programme Outcomes						
1. Define the concepts in plant morphology and rules of IUCN in botanical nomenclature.		K1						
2. Classify systems of plant classification and recognize		K2						

the importance of herbarium and virtual herbarium.	
3. Describe the core concepts of economic Botany and relate its applications in human life.	K3
4. Analyze the characters of the families according to the Bentham and Hooker's system of classification.	K4
5. Assess terms and concepts related to Phylogenetic Systematics.	K5
UNIT	CONTENTS
I	BRYOPHYTES General characters, classification, (Watson, 1971) (up to family), Structure, reproduction and life histories of the following classes each with a suitable example: Hepaticopsida (<i>Riccia</i>); Anthocerotopsida (<i>Anthoceros</i>) and Bryopsida (<i>Polytrichum</i>) and Economic importance.
II	PTERIDOPHYTES General Characters, Classification (Reimer, 1954). Morphology, anatomy and reproduction of the taxa belonging to each of the following classes: Psilotopsida (<i>Psilotum</i>), Lycopsida (<i>Selaginella</i>), Sphenopsida (<i>Equisetum</i>), Pteropsida (<i>Marsilea</i>). Stellar Evolution. Economic importance. Apogamy and apospory, homospory and heterospory.
III	GYMNOSPERMS General Characters, Classification (Sporne, 1954). Morphology, anatomy and reproduction of the taxa belonging to each of the following orders: Cycadales (<i>Cycas</i>), Coniferales (<i>Pinus</i>). Gnetales (<i>Gnetum</i>). Economic importance.

IV	PALEOBOTANY Introduction to fossils and fossilization processes such as compression, casts, molds, petrification, impressions and coal balls. Geological time scale. Radiocarbon dating. Contribution of Birbal Sahni. Study of the following fossils: Rhynia, Lepidodendron and Calamities.
V	EVOLUTION Evolution - origin of life, chemosynthetic theory, Theories of evolution - Darwin, Lamarck and De Vries and modern synthetic theory. Variation - analysis and sources, adaptive radiation, Concept of species - Allopatric and sympatric.

Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

GYMNOSPERMS, PALEOBOTANY AND EVOLUTION –
PRACTICAL-III**

Title of the Course	PRACTICAL-III PLANT DIVERSITY III BRYOPHYTES, PTERIDOPHYTES, GYMNOSPERMS, PALEOBOTANY AND EVOLUTION -						
Paper Number	CORE VI						
Category	Core	Year	II	Credits	3	Course Code	23UBT6P
		Semester	III				
Instructional Hours per week		Lecture	Tutorial		Lab Practice	Total	
		2	-		3	5	
Pre-requisite		Students should be familiar with the basics of Bryophytes and Pteridophytes.					
Learning Objectives							
C1	To enable students gain expertise in hand sectioning technique.						
C2	To study diversity of Bryophytes and Pteridophytes.						
C3	To understand the anatomical structure of the Bryophytes and Pteridophytes.						
C4	Develop comprehensive skills in sectioning and micro preparation.						
C5	Describe the structure of fossil forms prescribed in the syllabus.						
Course outcomes: On successful completion of this course the student will be able to: CO	Programme Outcomes						
1.Recognize the major groups of Non-vascular and Vascular cryptogams	K1						
2.Describe the structure of Bryophytes and Pteridophytes forms prescribed in the syllabus.	K2						

3. Identify and illustrate the morphological and anatomical features of bryophytes and Pteridophytes.	K3
4. Develop comprehensive skills in sectioning and micro preparation.	K4
5. Interpret the significance of reproductive structures in Bryophytes and Pteridophytes.	K5

EXPERIMENTS

Bryophytes

1. Study of morphology, anatomy and structure of the vegetative and reproductive organs of Bryophytes genera included in the theory syllabus.
2. Hepaticopsida (*Riccia/Marchantia*); Anthocerotopsida (*Anthoceros*) and Bryopsida (*Funaria/Polytrichum*) (Examples may be changed according to the availability of the specimens) (need not study developmental aspects).

Pteridophytes

3. Study of morphology, anatomy and structure of the vegetative and reproductive organs of Pteridophytes genera and fossils included in the theory syllabus.
Psilotopsida (*Psilotum*), Lycopsida (*Lycopodium/Selaginella*), Sphenopsida (*Equisetum*), Pteropsida (*Adiantum/Marsilea*). (Examples may be changed according to the availability of the specimens).
4. Identifying the micro slides relevant to the syllabus.
5. Botanical excursion.

GYMNOSPERMS 1. Study of morphology, anatomy and structure of the vegetative and reproductive organs of <i>Cycas</i> , <i>Pinus</i> and <i>Gnetum</i> . 2. Identifying the micro slides relevant to the syllabus. 3. Field visit to study the habitat (Hill station). PALEOBOTANY Study the following fossil members: <i>Rhynia</i> , <i>Lepidodendron</i> , <i>Lepidocarpon</i> , <i>Calamites</i> and <i>Williamsonia seawardiana</i> through permanent slides. EVOLUTION Photograph of evolution scientists.	
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Texts	1. Sharma, O.P. 2017. Bryophyta, MacMillan India Ltd, New Delhi. 2. Sharma, O.P. 2012. Pteridophyta, Tata McGraw-Hills Ltd, New Delhi. 3. Ashok, M. Bendre and Kumar. 2010. SEMESTER-IV**CORE VII CELL BIOLOGY, GENETICS AND PLANT BREEDING**

Title of the Course	CELL BIOLOGY, GENETICS AND PLANT BREEDING						
Paper Number	CORE VII						
Category	Core	Year	II	Credits	4	Course Code	23UBT7
		Semester	IV				
Instructional Hours per week	Lecture		Tutorial		Lab Practice	Total	
	3		2		-	5	
Pre-requisite		To acquire knowledge on cell and expose the students a fundamental of the various techniques used in plant breeding.					
Learning Objectives							
C1		To enable students to gain insights into cell wall organization and its functions.					
C2		To familiarize with various cell organelles and their functions.					
C3		To gain knowledge in classical genetics.					
C4		To know about sex linked inheritance.					
C5		To have knowledge about plant breeding techniques for crop improvement.					
Course outcomes: On completion of this course, the students will be able to: CO		Programme Outcomes					
1 Enumerate the structure and functions of cells, cellular structures and organelles.		K1					
2. Explain about cell cycle, cell division and laws of inheritance		K2					

with suitable examples.	
3. Elucidate concepts of sex determination and sex linked inheritance.	K3
4. Analyze the importance of genes interactions at population and evolutionary levels.	K4
5. Develop conceptual understanding of plant genetic resources, plant breeding, gene bank and gene pool.	K5
UNIT	CONTENTS
I	CELL BIOLOGY Introduction- scope- cell organisation- Ultra structure of Prokaryotic cell and Eukaryotic cell. Plant cell structure and function. Cell boundaries-Structure , chemistry and functions of cell wall, pits- (simple and bordered), Plasmodesmata. Plasma membrane- occurrence, structure (fluid mosaic model) chemistry, function and origin, endocytosis and exocytosis.
II	CELL BIOLOGY Occurrence, structure, function and origin of Endoplasmic reticulum, Golgi apparatus, Lysosomes, Ribosomes, Mitochondria, Chloroplast .Ultrastructure and functions of Nucleus, chromosomes structure, molecular organization and chromatin- Euchromatin, heterochromatin, Polytene and Lampbrushchromosomes, Mitosis and Meiosis- their significance.
III	GENETICS Mendelian genetics—monohybrid, dihybrid crosses. Laws of Mendel, Reciprocal cross - Back cross and Test cross. Incomplete dominance - <i>Mirabilis jalapa</i> . Interaction of factors— Complementary genes, Supplementary genes, inhibitory genes, epistasis (dominant and recessive), duplicate genes and multiple alleles. Chromosome theory of linkage, crossing over, Sex determination in plants.

IV	GENETICS Sexlinked inheritance–Haemophilia and colour blindness. Polyploidy - origin, types and significance. Mutation – types and significance. Chromosomal aberration – addition, deletion, inversion, duplication and translocation. Population genetics – Hardy – Weinberg principle.
V	PLANT BREEDING Principles involved in plant breeding. Plant introduction and acclimatization. Methods of crop improvement: selection (mass, pure line and clonal), hybridization techniques. Heterosis – Interspecific and intergeneric, causes and effects. Polyploidy in plant breeding and its applications. Breeding for crop improvement for paddy and sugarcane.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

ELECTIVE ALLIED BOTANY-I

Title of the Course		ALLIED BOTANY-I						
Paper Number		Core-Allied-I						
Category		Core	Year	I	Credits	2	Course Code	
			Semester	I				
Instructional Hours per week			Lecture		Tutorial		Lab Practice	Total
			3		1		-	4
Pre-requisite			To study the basics of botany.					
Learning Objectives								
C1		To study morphological and anatomical adaptations of plants of various habitats.						
C2		To demonstrate techniques of plant tissue culture.						
C3		To familiarize with the structure of DNA, RNA.						
C4		To carryout experiments related with plant physiology.						
C5		To perform biochemistry experiments.						
Course outcomes: On completion of this course, the students will be able to: CO		Programme Outcomes						
1. Increase the awareness and appreciation of human friendly algae and their economic importance.		K1						
2. Develop an understanding of microbes and fungi and appreciate their adaptive strategies		K2						
3. Develop critical understanding on morphology, anatomy and reproduction of Bryophytes, Pteridophytes		K3						

and Gymnosperms.	
1. Compare the structure and function of cells and explain the development of cells.	K4
2. Understand the core concepts and fundamentals of plant biotechnology and genetic engineering.	K5
UNIT	CONTENTS
I	Algae: General characters of algae - Structure, reproduction and life cycle of the following genera - <i>Anabaena</i> and <i>Sargassum</i> and economic importance of algae.
II	Fungi, Bacteria and Virus: General characters of fungi, structure, reproduction and life cycle of the following genera - <i>Penicillium</i> and <i>Agaricus</i> and economic importance of fungi. Bacteria - general characters, structure and reproduction of <i>Escherichia coli</i> and economic importance of bacteria. Virus - general characters, structure of TMV, structure of bacteriophage.
III	Bryophytes, Pteridophytes and Gymnosperms: General characters of Bryophytes, Structure and life cycle of <i>Funaria</i> . General characters of Pteridophytes, Structure and life cycle of <i>Lycopodium</i> . General characters of Gymnosperms, Structure and life cycle of <i>Cycas</i> .
IV	Cell Biology: Prokaryotic and Eukaryotic cell- structure /organization. Cell organelles - ultra structure and function of chloroplast, mitochondria and nucleus. Cell division - mitosis and meiosis.
V	Genetics and Plant Biotechnology: Mendelism - Law of dominance, Law of segregation, Incomplete dominance. Law of independent assortment. Monohybrid and dihybrid cross - Test cross - Back cross. Plant tissue culture - <i>In vitro</i> culture methods. Plant tissue culture and its application in biotechnology.
Extended Professional Component (is a part of internal component only, Not to be included	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

in the External Examination question paper)

ELECTIVE ALLIED BOTANY-II

Title of the Course	ALLIED BOTANY-II					
Paper Number	Coree-Allied-II					
Category	Core	Year	I	Credits	2	CourseCode
		Semester	II			
Instructional Hours per week	Lecture		Tutorial		Lab Practice	Total
	3		1		-	4
Pre-requisite	To study basics of botany.					
Learning Objectives						
C1	To be familiar with the basic concepts and principles of plant systematics.					
C2	Learn the importance of plant anatomy in plant production systems.					
C3	Understand the mechanism underling the shift from vegetative to reproductive phase.					
C4	To learn about the physiological processes that underlie plant metabolism.					
C5	To know the energy production and its utilization in plants.					
Course outcomes : On completion of this course, the students will be able to: CO	Programme Outcomes					
1. Understand the fundamental concepts of plant anatomy and embryology.	K1					
2.	K2					

Analyze and recognize the different organs of plants and secondary growth.	
3. Understand water relation of plants with respect to various physiological processes.	K3
4. Classify aerobic and anaerobic respiration.	K4
5. Classify plant systematics and recognize the importance of herbarium and virtual herbarium.	K5
UNIT	CONTENTS
	MORPHOLOGY OF FLOWERING PLANTS: Plant and its parts. Structure and function of root and stem. Leaf and its parts.

I	Leaf types- simple and compound. Phyllotaxy and types. Inflorescence - Racemose, Cymose and Special types. Terminology with reference to flower description.
II	TAXONOMY: Study of the range of characters and plants of economic importance in the following families: Rutaceae, Caesalpiniaceae, Asclepiadaceae, Euphorbiaceae and Cannaceae
III	ANATOMY Tissue and tissue systems: Simple and complex tissues. Anatomy of monocot and dicot roots - anatomy of monocot and dicot stems - anatomy of dicot and monocot leaves.
IV	EMBRYOLOGY Structure of mature anther and ovule - Types of ovules, structure of embryo sac, pollination -double fertilization, structure of dicotyledonous and monocotyledonous seeds.
V	PLANT PHYSIOLOGY Absorption of water, photosynthesis - light reaction - Calvin cycle; respiration - Glycolysis - Krebs cycle - electron transport system. Growth hormones - auxins and cytokinins and their applications.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

ELECTIVE ALLIED BOTANY PRACTICALS

Title of the Course	ALLIED BOTANY PRACTICALS						
Paper Number	Core-Allied Practicals-I						
Category	Core	Year	I	Credits	2	Course Code	
		Semester	II				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		1		-		3	4
Pre-requisite		Practicals pertaining to above subjects is important to get knowledge on various aspects of plants.					
Learning Objectives							
C1	To enhance information on the identification of each taxonomical group by developing the skill-based detection of the morphology and microstructure of microorganisms, algae, and fungi.						
C2	To comprehend the fundamental concepts and methods used to identify Bryophytes, Pteridophytes and Gymnosperms through morphological changes and evolution, anatomy and reproduction.						
C3	To be familiar with the basic concepts and principles of plant systematics.						
C4	Understanding of laws of inheritance, genetic basis of loci and alleles.						
C5	To learn about the physiological processes that underlie plant metabolism.						
Course outcomes:	Programme Outcomes						
On completion of this course, the students will be able to: CO							
1. To study the internal organization of algae and fungi.	K1						
2. Develop critical understanding on morphology, anatomy and reproduction of Bryophytes.	K2						

Pteridophytes and Gymnosperms..	
3. To study the classical taxonomy with reference to different parameters.	K3
4. Understand the fundamental concepts of plant anatomy and embryology	K4
5. To study the effect of various physical factors on photosynthesis.	K5
<p style="text-align: center;">EXPERIMENTS</p> <ol style="list-style-type: none"> 1. Make suitable micro preparation of the types prescribed in Algae, Fungi, Bryophytes, Pteridophytes and Gymnosperms. 2. Micro photographs of the cell organelles ultra structure. 3. Simple genetic problems. 4. To describe in technical terms, plants belonging to any of the family prescribes and to identify the family. 5. To dissect a flower, construct floral diagram and write floral formula. 6. Demonstration experiments <ol style="list-style-type: none"> 1. Ganong's Light screen 2. Ganong's respiroscope 7. To make suitable micro preparations of anatomy materials prescribed in the syllabus. 8. Spotters - Algae, Fungi, Bryophytes, Pteridophytes, Gymnosperms and Angiosperm anatomy, Embryology, Cell biology and Biotechnology. 	
Extended Professional Component	<p>Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)</p>

(is a part of internal component only, Not to be included in the External Examination question paper)	
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

NON-MAJOR ELECTIVE-I**1. ORGANIC FARMING**

Title of the Course	ORGANIC FARMING						
Paper Number	Non-Major Elective-I						
Category	Elective	Year	I	Credits	1	CourseCode	
		Semester	I				
Instructional Hours per week		Lecture	Tutorial	Lab Practice	Total		
		2	-	-	2		
Pre-requisite	Students to gain knowledge on the scope of organic farming and its significance.						
Learning Objectives							
C1	To enable students to gain knowledge on the scope of organic farming and its significance.						
C2	To impart practical insights sustainable agriculture, green manuring, recycling and composting.						
C3	To understand the physical and chemical properties of soil.						
C4	To study sustainable agriculture.						
C5	To know about the importance of biofertilizers.						
Course outcomes:	Programme Outcomes						
On completion of this course, the students will be able to: CO							
1. Recognize the different forms of biofertilizers and	K1						

their uses.	
2. Explain and interpret the components, patterns, and processes of bacteria for growth in crop production.	K2
3. Apply techniques for synthesizing green manure and develop strategies to increase crop yield.	K3
4. Analyze and decipher the significance of biofertilizers in soil fertility.	K4
5. Develop new	K5

strategies to enhance growth and quality check of medicinal herbs considering the practical issues pertinent to India.	
UNIT	CONTENTS
I	Soil – physical, chemical properties. Soil pollution – oil, chemicals –fertilizers, pesticide and herbicide, non-degradable solids, biomagnification, consequences of land pollution – damage to soil and crops.
II	Organic farming – definition, basic concept of organic farming, integrated plant nutrient supply management, integrated insect pest and disease management, integrated soil and water management. Sustainable agriculture practices-crop rotation, mixed cropping.
III	Management of organic wastes and green manures: Farm manures, Composts, Mulches and pest control, importance of organic manure, importance of green manure, crops of green manure, oil cake. Animal based organic manure–cow dung, vermicompost-methods, production and utilization.
IV	Biofertilizers–classification, nitrogen fixers– <i>Rhizobium</i> , Cyanobacteria, <i>Azolla</i> and Vesicular Arbuscular Mycorrhiza.
V	Recycling of bio-degradable municipal, agricultural and Industrial wastes – biocompost making methods.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

2. ENVIRONMENTAL BIOTECHNOLOGY

Title of the Course	ENVIRONMENTAL BIOTECHNOLOGY					
Paper Number	Non-Major Elective-I					
Category	Elective	Year	I	Credits	1	CourseCode
		Semester	I			
Instructional Hours per week		Lecture	Tutorial		Lab Practice	Total
		2	-		-	2
Pre-requisite		To understand the various applications of environmental biotechnology.				
Learning Objectives						
C1	To introduce the student to the various developed and applications of environmental biotechnology.					
C2	To provide knowledge about the scope of bioremediation and bioleaching using GMOs.					
C3	To study about pollution of water bodies.					
C4	To know about bioremediation.					
C5	To study about biomineralization.					
Course outcomes:	Programme Outcomes					
On completion of this course, the students will be able to: CO						
1. Recognize the various causes of pollution and control measures.	K1					
2. Explain about the beneficially role of GMOs on environment.	K2					
3. Reflect	K3					

upon various sustainable environmental protection strategies.	
4. Analyze the different methods of air, water, and soil quality monitoring process.	K4
5. Evaluate the implications of international legislations and policies for environmental protection.	K5
UNIT	CONTENTS
I	Introduction: The environment-soil, water and air, Pollution and its causes (outline only)
II	Source and treatment of polluted waters and effluents: Pollution of water bodies by heavy metals and pesticides – removal of heavy metals and pesticides by Biosorption. Removal of oil spills by using microbes. Biological treatment of sewage – characteristics of sewage and objectives in sewage treatment – Anaerobic digestion.
III	Soil and air pollution and their treatment: Soil pollution by Xenobiotics. Degradation of Xenobiotics – pathways of phenol, pentachlorophenol and polychlorinated biphenyl degradation.
IV	Bioremediation: Introduction to bioremediation, <i>ex situ</i> and <i>in situ</i> bioremediation.
V	Biometallurgy and related topics: Biomining – bioleaching - Biofilms and biocorrosion.
Extended Professional Component (is a part of internal component only, Not to be	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

3. NURSERY AND LANDSCAPING

Title of the Course		NURSERY AND LANDSCAPING						
Paper Number		Non-Major Elective-I						
Category	Elective	Year	I	Credits	1	Course Code		
		Semester	I					
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total	
		2		-		-	2	
Pre-requisite		Students should know about the fundamental concepts of nursery and landscaping.						
Learning Objectives								
C1		To recognize the importance of growing plants and practice the knowledge gained by developing kitchen garden and ornamental garden.						
C2		To be able to design gardens and become entrepreneur in Horticulture.						
C3		To study the methods of propagation.						
C4		To know about nursery structure.						
C5		To learn about gardening.						
Course outcomes:		Programme Outcomes						
On completion of this course, the students will be able to: CO								
1. Recognize the basic principles and components of gardening.		K1						
2. Explain about bio-aesthetic planning and conceptualize flower arrangement.		K2						
3. Apply techniques for design various types of gardens according to the culture and art of bonsai.		K3 & K6						
4. Compare and contrast different		K4						

garden styles and landscaping patterns.	
5. Establish and maintain special types of gardens for outdoor and indoor landscaping.	K5 & K6
UNIT	CONTENTS
I	Introduction, prospects and scope of nursery and landscaping.
II	Methods of Propagation – cutting, layering, grafting, budding, Floriculture – Rose, Chrysanthemum, Jasmine – cultivation.
III	Gardening – formal garden, informal garden, vegetable garden, landscaped layout designing – formation and maintenance of lawn.
IV	Nursery structures – Green house – Shade house, Mist chamber – Topiary, Bonsai culture.
V	Manures, composting – vermicomposting.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

NON-MAJOR ELECTIVE-II**1. MUSHROOM CULTIVATION**

Title of the Course	MUSHROOM CULTIVATION					
Paper Number	Non-Major Elective-II					
Category	Elective	Year	I	Credits	1	CourseCode
		Semester	II			
Instructional Hours per week	Lecture		Tutorial		Lab Practice	Total
	2		-		-	2
Pre-requisite		Basic knowledge on structure and function of various groups of mushrooms.				
Course Objectives						
C1		To learn and develop skills in mushroom cultivation.				
C2		To understand and appreciate the role of mushrooms in Nutrition, Medicine and health.				
C3		To cultivate mushroom cultivation in small scale industry.				
C4		To learn about diseases and post harvest technology.				
C5		To study new methods and strategies to contribute to mushroom production.				
Course outcomes: On completion of this course, the students will be able to: CO		Programme Outcomes				
1. Recall various types and categories of mushroom.		K1				
2. Explain about various types of food technologies associated with mushroom industry.		K2				
3. Apply techniques studied for cultivation of various types of		K3				

mushroom.	
4. Analyze and decipher the environmental factors and economic value associated with mushroom cultivation	K4
5. Develop new methods and strategies to contribute to mushroom production.	K5 & K6
UNIT	CONTENTS
I	Introduction: Morphology, Types of Mushroom, identification of edible and poisonous mushroom, Nutritive values, life cycle of common edible mushrooms.
II	Mushroom cultivation, prospects and scope of Mushroom cultivation in small scale Industry.
III	Life cycle of <i>Pleurotus spp</i> and <i>Agaricus spp</i> .
IV	Spawn production, growth media, spawn running and harvesting of mushrooms and marketing.
V	Diseases and post harvest technology, Insect pests, nematodes, mites, viruses, fungal competitors and other important diseases.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)

NON-MAJOR ELECTIVE-II
2. HERBAL MEDICINE

Title of the Course		HERBAL MEDICINE				
Paper Number		Non-Major Elective-II				
Category	Elective	Year	I	Credits	1	CourseCode
		Semester	II			
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total
		2		-	-	2
Pre-requisite		To understand the importance of herbal medicine.				
Learning Objectives						
C1		To understand the nuances of medicinal plants and their phytoconstituents of commercial value				
C2		To design and develop medicinal garden.				
C3		To apply the knowledge to cultivate medical plants.				
C4		To know the pharmacological importance of medicinal plants.				
C5		To enlist phytochemicals and secondary metabolites of market and commercial value.				
Course outcomes: On completion of this course, the students will be able to: CO		Programme Outcomes				
1. Define and describe the principle of cultivation of herbal products.		K1				
2. Explain about the phytochemistry of economically important medicinal herbs		K2				
3. Apply techniques for evaluation of drug adulteration through biological testing.		K3				
4. Formulate the value added processing / storage / quality control for the better use of herbal medicine.		K4				

5. Develop the skills for cultivation of plants and their value added processing/storage/quality control.	K5 & K6
UNIT	CONTENTS
I	Importance and Relevance of Herbal drugs in Indian System of Medicine, Pharmacognosy – Aim and scope.
II	Medicinal gardening – Gardens in the Hills and plains; House gardens; plants for gardening – Poisonous plants – Types of plant poison; action of poisons; treatment for poisons, some poisonous plants; their toxicity and action.
III	Adulteration of crude drugs and its detection – methods of adulteration; types of adulteration. Medicinal plants of export values; rejuvenating herbs; Medicinal uses of Non-flowering plants.
IV	Botanical description and active principles of Root drugs; Rhizomes woods and bark drugs (Two examples for each plant organs).
V	Botanical description and active principles of leaves; Flowers; Fruits seed and entire plants as drugs. Taxonomic study of some selected herbals (Two examples for each plant organs).
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

3. GLOBAL CLIMATE CHANGE

Title of the Course	GLOBAL CLIMATE CHANGE						
Paper Number	Non-Major Elective-II						
Category	Elective	Year	I	Credits	1	CourseCode	
		Semester	II				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		2		-		-	2
Pre-requisite		To understand the implications of carbon and ecological footprint.					
Learning Objectives							
C1	To gain insights on the impact of greenhouse effect on global climate change and mitigation measures.						
C2	To understand the implications of carbon and ecological footprint.						
C3	To apply the knowledge to green house effects.						
C4	To know the rain and its effects on plants.						
C5	To know about Global Environmental change issues.						
Course outcomes:	Programme Outcomes						
On completion of this course, the students will be able to: CO							
1. Relate to the anthropogenic pressure on the environment and carbon footprint.	K1						
2. Explain about the physical basis of natural green gas house effect on man and materials.	K2						
3. Evaluate human influenced	K3						

driver of our climate system and its applications	
4. Analyze the causes and effects of depletion of the stratospheric ozone layer.	K4
5. Develop new strategies to mitigate issues of global environmental change.	K5 & K6
UNIT	CONTENTS
I	Global Environmental change issues. UNFCCC, IPCC, Koyoto protocol, CDM, Carbon footprint and ecological footprint.
II	Stratospheric ozone layer: Evolution of ozone layer; Causes of depletion and consequences; Effects of enhanced UV-B on plants, microbes, animals, human health and materials; Global efforts for mitigation ozone layer depletion.
III	Climate change: Green house effects; causes; Green house gases and their sources; Consequences of climate, oceans, agriculture, natural vegetation and humans; International efforts on climate change issues.
IV	Atmospheric deposition: Past and present scenario; Causes and consequences of excessive atmospheric deposition of nutrients and trace elements; Eutrophication.
V	Acid rain and its effects on plants, animals, microbes and ecosystems.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

SEMESTER – V

CORE IX - PLANT MORPHOLOGY, TAXONOMY AND ECONOMIC BOTANY

Title of the Course		PLANT MORPHOLOGY, TAXONOMY AND ECONOMIC BOTANY						
Paper Number		CORE IX						
Category	Core	Year	III	Credits	4	Course Code	23UBT9	
		Semester	V					
Instructional Hours per week		Lecture		Tutorial		Lab Practice		Total
		3		-		2		5
Pre-requisite		Prior knowledge on morphological, anatomical characteristics and uses of plants.						
Learning Objectives								
C1	Students will have extensive knowledge of the morphology (vegetative structures and floral structures) of flowering plants.							
C2	Students will know about the basic concepts of classification of plants.							
C3	Understand major evolutionary trends in Angiospermic plants.							
C4	To know the characteristic features of the selected families.							
C5	To know the economic importance of plants.							
Course outcomes: On completion of this course, the students will be able to: CO				Programme Outcomes				
6. Define the concepts in plant morphology and rules of IUCN in botanical nomenclature.				K1				
7. Classify systems of plant classification and recognize the importance of herbarium and virtual herbarium.				K2				
8. Describe the core concepts of economic Botany and relate its applications in human life.				K3				
9. Analyze the characters of the families according to the Bentham and Hooker's system of classification.				K4				
10. Assess terms and concepts related to Phylogenetic Systematics.				K5				
UNIT	CONTENTS							
I	Morphology Shoot system – modifications (Aerial, sub-aerial and underground), Root system – modifications. Leaf Types: Simple and Compound. Phyllotaxy: Types, modifications (phyllode, pitcher, tendrils, stipules). Inflorescences: Definition and types (Racemose, Cymose, mixed and special types). Fruits: Types and classification.							

II	Classification of Angiosperms Classification: Artificial, Natural and Phylogenetic systems. Bentham and Hooker system of classification and APG Classification. Herbarium technique: collection, pressing, drying, mounting and preservation of plant specimens. Digital herbarium. Botanical Survey of India. Botanical nomenclature rules and regulations (typification and author citation).
III	Characters of Angiosperms Vegetative, floral characters and economic importance of following families based on the Natural system: Annonaceae, Nymphaeaceae, Capparidaceae, Rutaceae, Caesalpiniaceae, Cucurbitaceae, Asteraceae, Apocynaceae and Asclepiadaceae.
IV	Characters of Angiosperms Vegetative, floral characters and economic importance of following families based on the Natural system: Convolvulaceae, Acanthaceae, Lamiaceae, Amaranthaceae, Euphorbiaceae, Liliaceae, Orchidaceae and Poaceae.
V	Economic Botany Source, cultivation method (brief) and of the economically important products of the following – Cereals (Rice, wheat), Pulses (Black gram, Chickpea), spices and condiments (Cardamom, Coriander) and timber plants (Teak). Extraction/processing of essential oil (Rose), Fiber (Cotton). natural rubber, Sugar (Sugarcane), Beverages (Coffee, Tea), Oil seeds (Groundnut, Sesame),

Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)		Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

CORE XI - PLANT ANATOMY AND EMBRYOLOGY

Title of the Course		PLANT ANATOMY AND EMBRYOLOGY						
Paper Number		CORE XI						
Category	Core	Year	III	Credits	4	Course Code	23UBT10	
		Semester	V					
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total		
		3		2	-	5		
Pre-requisite		To acquire knowledge on the anatomical structure and reproductive phase of angiosperms.						
Learning Objectives								
C1	To know fundamental concepts of plant anatomy and embryology.							
C2	To understand the internal tissue organization of various plant organs.							
C3	To differentiate normal and abnormal secondary growth.							
C4	To comprehend the structural organization of flower with relevance to the process of pollination and fertilization.							
C5	To know embryology of plants.							
Course outcomes: On completion of this course, the students will be able to: CO				Programme Outcomes				
1. Relate to the fundamental concepts of plant anatomy and embryology.				K1				
2. Describe the internal tissue organization of various plant organs.				K2				
3. Elucidate the stages of normal and abnormal secondary growth.				K3				
4. Compare the structural organization of flower in relation to the process of pollination and fertilization.				K4				
5. Access the various anatomical adaptations in plants.				K5				
UNIT		CONTENTS						
I	Anatomy Cell wall - structure and functions. Tissues - Definition, types: Simple tissue system - parenchyma, collenchyma and sclerenchyma (fibers and sclereids). Complex tissue system - xylem and phloem. Meristem: definition, structure, function and classification. Apical organization of shoot and root apex theories: Apical cell theory, Histogen theory, Tunica-Corpus theory, Histogen theory and Korper-Kappe theory.							

II	Anatomy Primary structure of stem and root (Dicot and monocot). Epidermal tissue system: epidermis, cuticle, trichome, bulliform cells, periderm and silica cells. Ground tissue systems: cortex, endodermis, pericycle, pith and pith rays. Vascular tissue systems: different types of vascular bundles and their arrangement in stem and root. Nodal anatomy: Unilacunar, trilacunar and multilacunar.
III	Anatomy Secondary thickening of stems and root of monocots and dicots. Anomalous secondary growth of stem- Boerhaavia, Nyctanthes, Achyranthus and Dracaena. Leaf anatomy: Dicot and monocot. Periderm - structure and development (Phellem, Phellogen, Phelloderm, Rhytidome and lenticels). Stomatal types.
IV	Embryology Structure and development of anther - development of male gametophyte. Ovule: Structure and types of ovules, female gametophyte– megasporogenesis (monosporic, bisporic and tetrasporic) and megagametogenesis (Polygonum type); Organization and ultra structure of mature embryo sac.
V	Embryology Double fertilization and triple fusion. Endosperm and its types (free nuclear, cellular, helobial, endosperm haustoria). Polyembryony - types, apomixis, parthenogenesis and parthenocarp. Seed structure and its importance.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

**CORE XI – PRACTICAL - V - MORPHOLOGY, TAXNOMY, ECONOMIC BOTANY,
ANATOMY AND EMBROLOGY**

Title of the Course		PRACTICAL-V - MORPHOLOGY, TAXNOMY, ECONOMIC BOTANY , ANATOMY AND EMBROLOGY					
Paper Number		CORE X					
Category	Core	Year	III	Credits	3	CourseCode	23UBT11P
		Semester	V				
Instructional Hours per week		Lecture		Tutorial	Lab Practice		Total
		2		-	3		5
Pre-requisite		Theoretical understanding of plant taxonomy as well as basic laboratory skills for the relevant core course.					
Learning Objectives							
C1	To study morphological characters of the families.						
C2	Able to describe the plant technically using the floral characteristics.						
C3	To preserve the plants and prepare herbarium sheets.						
C4	To be able to identify the local flora.						
C5	To understand the economic importance of the plants.						
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Recognize the distinguishing plant morphological characters.							
2. Identify locally available plants to their respective families.					K2		
3. Develop comprehensive skills in field identification, collection of specimens, writing technical description, botanical drawings and herbaria preparation.					K3		
4. Construct floral diagram and write floral formula for a given flower.					K4		
5. Validate the plant specimen by analyzing and dissecting the vegetative and floral characters.					K5		

MORPHOLOGY AND TAXONOMY OF ANGIOSPERMS

- Describe the plant parts with suitable plants- Technical term habit, habitat form, types of leaves, with leaf shape, margin, texture, modification of leaf.
- Study the Types and modification of root and stem with suitable example Identify the following inflorescence and fruits: a) Inflorescence - Simple raceme, Spike, Corymb, Head, simple cyme, Cyathium and Hypanthodium. b) Fruits - Simple: Berry, Drupe, Pepo, hesperidium. (Indehiscent) – Nut. Dry- Legume, capsule (loculicidal). Aggregate
- Floral formula from floral description.
- Identify the families mentioned in the syllabus by noting their vegetative and

floral Characters.

- Students must describe the floral parts, draw the L.S., floral diagram and write the floral formula of at least one flower from each family
- Study the products of plants mentioned in the syllabus of economic importance with Special reference to the morphology, botanical name and family.
- Prepare herbarium of 20 plants with field notes (internal assessment).
- Conduct National level (3 to 5 days)/short visit(one day), Botanical tour under the guidance of teacher and Submit field report.

Economic Botany

Identification of Botanical Name, Family, Useful Parts and Economic Importance of following – Cereal (Rice, Wheat), Pulses (Black gram, Chickpea), Sugar (Sugarcane), Beverage (Coffee, Tea), Oil seed (Groundnut, Sesame), spices and condiments (Cardamom, Coriander), essential oil (Rose), natural rubber and timber plants (Teak) and Fibre (Cotton).

Anatomy

- Study of simple and complex (Primary and Secondary) tissues by maceration.
- Study the internal structure of primary (young) and secondary (old) stems. Internal structure of stem and root of dicot and monocot.
- Anomalous secondary growth in the stems of *Boerhaavia*, *Nyctanthus*, *Achyranthus* and *Dracaena*.
- T.S of dicot (*Nerium*) and monocot (Maize) leaves.
- Study of stomatal types.

Embryology

- T.S of Anther (*Datura*).
- Dissection and display of pollinia (*Calotropis*).
- Types of ovules- Anatropous, Orthotropous, Circinotropous, Amphitropous, Campylotropous (Permanent slides).
- Types of Endosperm - Nuclear, cellular and helobial. (Permanent slides).
- Dissection and display of any two stages of embryo in *Tridax*

Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this Course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

CORE XII – PROJECT EVALUATION

Title of the Course	PROJECT EVALUATION						
Paper Number	CORE XII						
Category	Core	Year	III	Credits	3	CourseCode	23UBT12PW
		Semester	V				

The project evaluation which will be conducted by both the internal and external examiners during the end semester university practical examinations.

Internal: 40 marks

I Review – Selection of the field of study, topic and literature collection : 15 marks

II Review – Research design and data collection : 10 marks

III Review – Analysis and conclusion, preparation of rough draft : 15 marks

External: 60 marks

Thesis/ Dissertation : 30 marks

Presentation : 15 marks

Viva-voce : 15 marks

Total : 100 marks

DISCIPLINE SPECIFIC ELECTIVE COURSE – I

BIO-ANALYTICAL TECHNIQUES

Title of the Course	DISCIPILNE SPECIFIC ELETIVE-1 - BIO-ANALYTICAL TECHNIQUES						
Paper Number	Elective-I						
Category	Elective	Year	III	Credits	3	Course Code	23UBTE1A
		Semester	V				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		To impart expertise about analysis and research.					
Learning Objectives							
C1		To understand the principle, operation and maintenance of various tools/equipment in the laboratory.					
C2		Perform experiments using the laboratory instruments, formulate experiments for project work and evaluate critically the acquisition of data.					
C3		To equip students to collect, analyze and evaluate data generated by their own inquiries in a scientific manner.					
C4		To give an exposure to various forms of field research and data analysis techniques.					
C5		To provide an overview on modern equipments that they would help students gain confidences to instantly commence research careers and/or start entrepreneurial ventures.					
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Relate to the various biological techniques and its importance.					K1		
2. Explain the principles of Light microscopy, compound microscopy, Fluorescence microscopy and electron microscopy.					K2		
3. Apply suitable strategies in data collections and disseminating research findings.					K3 & K6		
4. Compare and contrast the significance of different types of chromatography techniques.					K4		
5. Develop methodologies for extraction and analysis of biochemical compounds.					K5		

UNIT	CONTENTS
I	MICROSCOPY: Principles of microscopy; Light microscopy; compound microscopy, bright field microscope, dark field microscope, phase-contrast microscope, Fluorescence microscopy; Transmission and Scanning electron microscopy. Microscopic measurements-micrometry, Microscopy drawing: Camera Lucida.
II	CHROMATOGRAPHIC PRINCIPLES AND APPLICATIONS: Principle; Paper chromatography, Thin Layer Chromatography (TLC), Column chromatography, Gas chromatography – Mass spectrometry (GC-MS), High Performance Liquid Chromatography (HPLC).
III	ELECTROPHORESIS AND pH METER: Basic principle and operation of pH meter. SDS-Polyacrylamide gel electrophoresis (SDS-PAGE), Agarose Gel Electrophoresis (AGE).
IV	IV SPECTROPHOTOMETRY AND CENTRIFUGATION TECHNIQUE: Principle and law of absorption, operation and uses of colorimeter and UV-Visible spectrophotometer. Principles and methods of centrifugation, types of centrifuge and applications.
V	BIOSTATISTICS: Data collection methods, population, samples, parameters; Representation of Data: Tabular, Graphical– Histogram, frequency curve, Bar diagram. Measures of central tendency – Mean, Median and Mode. Standard deviation and Standard error, Chi-square test and goodness of fit –t-test.
Extended Component (is a part of internal component only, Not to be included in the External Examination question paper)	Professional Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

DISCIPLINE SPECIFIC ELECTIVE I**ENTREPRENEURIAL BOTANY**

Title of the Course		DISCIPILNE SPECIFIC ELETIVE - I - ENTREPRENEURIAL BOTANY					
Paper Number		Elective-I					
Category	Elective	Year	III	Credits	3	Course Code	23UBTE1B
		Semester	V				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		To develop innovative ideas to exploit the economically useful plant products for commercial purposes.					
Learning Objectives							
C1		To enable students to develop innovative ideas to exploit the economically useful plant products for commercial purposes.					
C2		To inculcate entrepreneurial values to start a new business. To enlighten people about bioventure.					
C3		To comprehend the molecular processes.					
C4		To expose the students a fundamental of the various value added products.					
C5		To introduce the entrepreneurial opportunities.					
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Recognize the significance of government agencies for entrepreneurship development.					K1		
2. Explain about entrepreneurial values, risk assessment and solutions					K2		
3. Make use of entrepreneurial opportunities.					K3		
4. Analyze and decipher the significance of bioventure and value added products.					K4		
5. Devise innovative methods for making value added products.					K5 & K6		
UNIT	CONTENTS						
I	INTRODUCTION : Need - definition and concept - Types and characterization - entrepreneurial values-motivation and barriers-entrepreneurship as innovation, risk assessment and solutions.						
II	BIOVENTURE : Industry - overview of Spirulina, Pleurotus, Natural dyes, Banana fibers, Wine, Hydroponics, Drumstick and coconut - Straight Vegetable Oil (SVO) and Pure Plant Oil (PPO) -methods and marketing - fresh and dry flowers for aesthetics.						

III	VALUE ADDED PRODUCTS : Canning of fruits - process and equipment, fruit and vegetable based products (squash) - ready to serve (RTS) (syrup, pulp, paste, ketchup, soup, vegetable sauces, jam and jellies), Palmyrah Palm products, Perfumes from Rose/Jasmine - Bamboo and cane based products-virgin coconut oil, jasmine oil production, nutraceuticals, standards and quality management.
IV	ORGANIZATIONS AND AGENCIES : TIIC, DIC, NABARD, MICROSTAT, DBT - case study - sarvodaya – SIDCO – Micro Small and Medium Enterprises – support structure for promoting entrepreneurship – various government schemes.
V	ENTREPRENEURIAL OPPORTUNITIES : Understanding a market and assessment, selection of an enterprise, business planning, mobilization of resources, Break Even Analysis, project proposal (guidelines, collection of information and preparation of project report), steps in filing patents, trademarks and copyright, Intellectual Property Rights, export and import license.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	
Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)	
Skills acquired from this course	
Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

DISCIPLINE SPECIFIC ELECTIVE-II**FORESTRY**

Title of the Course		DISCIPLINE SPECIFIC ELECTIVE- II – FORESTRY (ONLINE PAPER)					
Paper Number		Elective-II					
Category	Elective	Year	II	Credits	3	Course Code	23UBTE2A
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		Prior knowledge on trees, forests and their importance.					
Learning Objectives							
C1	To study the distribution pattern, composition and diversity of forest ecosystem						
C2	To understand the method of forest management principles and conservation.						
C3	To enable them to meaningfully contribute in the forest conservation.						
C4	To raise student awareness of the need to create a sustainable way of living and the current global issues with forestry caused by human interference.						
C5	To provide a platform to appreciate biodiversity and the importance.						
Course outcomes: On completion of this course, the students will be able to: CO						Programme Outcomes	
1. Relate to the basic concepts related to forest distribution, degradation, protection, management and resource utilization.						K1	
2. Understand complex interactions of humans and forest ecosystems in a global context.						K2	
3. Demonstrate skills for ecological measurements and interpretation of forest ecology management.						K3	
4. Examine and decipher the factors influencing forest vegetation, forest degradation and methods of wood preservation						K4	
5. Develop new strategies and apply the knowledge gained for problem-solving analysis in the conservation and management of forest ecosystems.						K5 & K6	
UNIT	CONTENTS						
I	SILVICULTURE : Forests – definition - Forest types - India and Tamil Nadu - revised classification - pure and mixed stands - even and uneven aged stands. Role of forests. Factors of locality - climatic - edaphic - topographic - biotic - interaction of forest with the environment.. Nursery techniques -. Vegetative and clonal propagation techniques and methods - macro and micro propagation techniques.						

II	FOREST MENSURATION AND MANAGEMENT: Forest Mensuration - Definition and objectives. Measurement of diameter, girth, height, crown and volume of trees - methods and principles - tree stem form - form factor. Volume estimation of stand - age - basal area determinations Stem and Stump Analysis. Forest inventory - sampling techniques and methods - measurement of crops - sample plots. Yield calculation - CAI and MAI - volume, yield and stand tables preparation.
III	FOREST UTILIZATION AND WOOD TECHNOLOGY: Logging - extraction of timber - felling rules and methods - conversion methods - conversion season. Implements used - cross cutting system - sawing - different types - extraction methods. Grading of timbers. Recent trends in logging - Ergonomics and RIL. Forest products - Timber - timber, fuel, pulp, paper, rayon and match. Wood Composites - plywood, particle board, fiber boards, MDF, hardboard, insulation boards - production technology. Non timber forest products (NTFP) - collection - processing and storage of NTFP - fibres and flosses - bamboos and canes - katha and bidi leaves - essential oils and oil seeds - gums and resins - tans and dyes - drugs - insecticides - lac and shellac - tassar silk.
IV	FOREST ECOLOGY Forest ecology - definition - biotic and abiotic components - forest ecosystem - forest community - concepts - succession - primary productivity - nutrient cycling. - association and diversity. Restoration ecology - global warming - green house effects - ozone layer depletion - acid rain - role of trees in environmental conservation. Biodiversity - Definition, origin, types - factors endangering biodiversity - biodiversity hotspots - endemism - Red Data Book.
V	AGRO FORESTRY AND SOCIAL FORESTRY : Agro forestry - definition, concept and objectives. Classification of agro forestry systems Tree-crop interactions - above and below ground - competition for space, water, light and nutrients. Microclimatic modifications - nutrient cycling and soil fertility improvement - Allelopathy and allelochemicals. - Ecological aspects of agro forestry - benefits and limitations of agro forestry. Agro forestry practices for wasteland reclamation. Social forestry - objectives and scope and necessity - its components and implementation in local and national levels - social attitudes and community participation. JFM - principles, objectives and methodology - choice of species for agro forestry and social forestry-Definition and scope urban forestry.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

DISCIPLINE SPECIFIC ELECTIVE-II
NATURAL RESOURCE MANAGEMENT

Title of the Course	DISCIPILNE SPECIFIC ELETIVE-II - NATURAL RESOURCE MANAGEMENT (ONLINE PAPER)						
Paper Number	Elective-II						
Category	Elective	Year	III	Credits	3	Course Code	23UBTE2B
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		To understand the concept of different natural resources and their utilization.					
Learning Objectives							
C1		To develop an appreciation for the natural resources and their ecological and economic impact.					
C2		To gain an understanding of various strategies of natural resource management.					
C3		To understand the concept of different natural resources and their utilization.					
C4		To create the models of natural resource conservation and maintenance.					
C5		To study the significance of natural resources pertaining to economy and environment.					
Course outcomes: On completion of this course, the students will be able to: CO						Programme Outcomes	
1. Relate to significance of natural resources pertaining to economy and environment						K1	
2. Understand the concept of different natural resources and their utilization.						K2	
3. Evaluate the management strategies of different natural resources.						K3	
4. Critically analyze the sustainable utilization land, water, forest and energy resources.						K4	
5. Design new models of natural resource conservation and maintenance.						K5 & K6	
UNIT	CONTENTS						
I	Introduction to Natural Resource Bases: Concept of resource, classification of natural resources. Factors influencing resource availability, distribution and uses. Interrelationships among natural resources. Concern on Productivity issues. Ecological, social and economic dimension of resource management.						
II	Forest resources: forest vegetation, status and distribution, major forest Forest resources: forest vegetation, status and distribution, major forest types and their characteristics, over-exploitation and deforestation. Timber extraction, mining, dams and their effects on forest and tribal people. Land resources: Dry land, land use						

	classification, land degradation, man induced landslides, soil erosion and desertification.
III	Landscape impact analysis, wetland ecology & management. Water resources: Use and over-utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. Food resources: World food problems, changes caused by agriculture and over-grazing, effects of modern agriculture, fertilizer-pesticide problems, water logging and salinity. Fish and other marine resources.
IV	Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources. Resource Management Paradigms: Resource management the evolution and history of resource management paradigms. Resource conflicts: Resource extraction, access and control system. Approaches in Resource Management: Ecological approach; economic approach; ethnological approach; implications of the approaches; integrated resource management strategies. Poverty and implications in Resource Management in developing countries – Poverty in developing countries, causes and link with resources scarcity and poverty.
V	Management of Common International Resources: Ocean and climate. Antarctica: the evolution of an international resource management regime. Resource management in mountain ecosystem, Dry-land ecosystem, The management of marine and coastal resources. Study of shifting Cultivation. Mangrove ecosystem and their management..
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

SKILL ENHANCEMENT COURSE – SEC VII**ORGANIC FARMING**

Title of the Course	SKILL ENHANCEMENT COURSE – NAAN MUTHALVAN IV - ORGANIC FARMING						
Paper Number	SEC VII						
Category	Elective	Year	I	Credits	1	Course Code	23UBTNMC4
		Semester	I				
Instructional Hours per week	Lecture		Tutorial		Lab Practice	Total	
	2		-		-	2	
Pre-requisite		Students to gain knowledge on the scope of organic farming and its significance.					
Learning Objectives							
C1	To enable students to gain knowledge on the scope of organic farming and its significance.						
C2	To impart practical insights sustainable agriculture, green manuring, recycling and composting.						
C3	To understand the physical and chemical properties of soil.						
C4	To study sustainable agriculture.						
C5	To know about the importance of biofertilizers.						
Course outcomes: On completion of this course, the students will be able to: CO						Programme Outcomes	
1. Recognize the different forms of biofertilizers and their uses.						K1	
2. Explain and interpret the components, patterns, and processes of bacteria for growth in crop production.						K2	
3. Apply techniques for synthesizing green manure and develop strategies to increase crop yield.						K3	
4. Analyze and decipher the significance of biofertilizers in soil fertility.						K4	
5. Develop new strategies to enhance growth and quality check of medicinal herbs considering the practical issues pertinent to India.						K5	
UNIT	CONTENTS						
I	Soil – physical, chemical properties. Soil pollution – oil, chemicals –fertilizers, pesticide and herbicide, non-degradable solids, biomagnification, consequences of land pollution – damage to soil and crops.						
II	Organic farming – definition, basic concept of organic farming, integrated plant nutrient supply management, integrated insect pest and disease management, integrated soil and water management. Sustainable agriculture practices-crop rotation, mixed cropping.						
	Management of organic wastes and green manures: Farm manures, Composts, Mulches and						

III	pest control, importance of organic manure, importance of green manure, crops of green manure, oil cake. Animal based organic manure–cow dung, vermicompost-methods, production and utilization.
IV	Biofertilizers–classification, nitrogen fixers–Rhizobium, Cyanobacteria, Azolla and Vesicular Arbuscular Mycorrhiza.
V	Recycling of bio-degradable municipal, agricultural and Industrial wastes – biocompost making methods.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

SUMMAR INTERNSHIP / INDUSTRIAL TRAINING

Title of the Course	VALUE ADDED FOOD PRODUCTS - FRUITS / VEGETABLES						
Paper Number							
Category	Core	Year	III	Credits		Course Code	23UIT

SEMESTER – VI**CORE XIII - PLANT ECOLOGY AND PHYTOGEOGRAPHY**

Title of the Course	PLANT ECOLOGY AND PHYTOGEOGRAPHY						
Paper Number	CORE XIII						
Category	Core	Year	III	Credits	4	Course Code	23UBT13
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		3		2		-	5
Pre-requisite		Understanding the environmental factors impacting biodiversity is crucial after taking this course.					
Learning Objectives							
C1	To relate to the significance of the biotic and abiotic components of the ecosystems.						
C2	To understand the energy flow in ecosystem.						
C3	To conceptualize the biodiversity.						
C4	To know implication of pollution on the environment.						
C5	To familiarize with the phytogeography.						
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Relate to the significance of the biotic and abiotic components of the ecosystems and energy flow.					K1		
2. Summarize the phytogeographical division of India.					K2		
3. Explain the implication of pollution on the environment.					K3		
4. Analyze the implications of functional and behavioral ecology in natural and man-made areas, biodiversity and conservation.					K4		
5. Develop mitigations for the effective conservation of biodiversity and disaster management.					K5		
UNIT	CONTENTS						
I	Biotic and abiotic factors and their influence on vegetation – a brief account of microbes, plants, animals, soil, wind, light, temperature, rainfall, and fire. Autecology and Synecology – Vegetation – Units of Vegetation – Formation, Association, Consociation, Society – development of vegetation. Migration – ecesis, colonization, Methods of study of vegetation (Quadrat and transect). Plant succession –Hydrosere and Xerosere. Ecological classification of plants: Morphological and anatomical features of plants and their correlation to the habitat factors.						
	Structure, trophic organization; food chains and food web, energy flow in an ecosystem. Types of ecosystems: pond, forest and grassland. Ecological pyramids and						

II	Bio-geochemical cycles of carbon, nitrogen and phosphorus. Biodiversity: Ecosystem/community, species and genetic diversity. Endemism and hotspots, Natural resources and its conservation (In situ and ex situ).
III	Pollution: Types, Pollutants - Primary and secondary and their impacts: Air - Green house effect, global warming, ozone depletion, acid rain, Water, soil-causes and consequences. Remedial measures – Green building. Disaster management, Environmental assessment and regulations.
IV	Phytogeography: Introduction, continuous and discontinuous distribution, Phytogeography of India, Vegetation regions of India. Plant indicators. Diversification of land plants. Speciation. Island Biogeography. Plant Biodiversity and its importance.
V	Definition, levels of biodiversity-genetic, species and ecosystem. Biodiversity hotspots of India. Loss of biodiversity – causes and its conservation. Seed banks - conservation of genetic resources and their importance. Consequences of deforestation and exploitation of targeted species; Forest conservation, Social forestry and Participatory Management of Forest. Concept of degeneration and regeneration of plants.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	
Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)	
Skills acquired from this course	
Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

CORE XIV - PLANT PHYSIOLOGY AND PLANT BIOCHEMISTRY

Title of the Course		PLANT PHYSIOLOGY AND PLANT BIOCHEMISTRY					
Paper Number		CORE XIV					
Category	Core	Year	III	Credits	4	Course Code	23UBT14
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		3		2		-	5
Pre-requisite		Basic knowledge on physiological processes in plants and primary and secondary plant metabolites and enzymes.					
Learning Objectives							
C1	To relate to water relation of plants with respect to various physiological phenomenon.						
C2	To know the pathways of photosynthesis.						
C3	To familiarize with respiration and nitrogen metabolism.						
C4	To know about plant growth regulators.						
C5	To familiarize with plant biochemistry.						
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Relate to water relation of plants with respect to various physiological phenomenon.					K1		
2. Explain the process and significance of photosynthesis and respiration.					K2		
3. Elucidate properties of nutrients and their deficiency symptoms in plants.					K3		
4. Analyze the biological role of plant growth regulators, carbohydrates, proteins, lipids, nucleic acids and enzymes.					K4		
5. Decipher the phenomenon of seed dormancy and germination in plants.					K5		
UNIT		CONTENTS					
I		WATER RELATIONS : Properties of water—imbibition, diffusion, osmosis and plasmolysis- ascent of sap, mechanism of water absorption – active and passive, apoplast and symplast pathway. Transpiration – types and factors affecting transpiration and significance. Opening and closing of stomata- mechanisms and theories of transpiration.					

II	PHOTOSYNTHESIS : Radiant energy, Photosynthetic unit, photosynthetic pigments and their role, photo systems, path of carbon in photosynthesis - Light reaction, electron transport system in the chloroplast (Z-Scheme). Dark reaction - C ₃ cycle, C ₄ cycle, CAM pathway, Photorespiration	
III	RESPIRATION : Aerobic, Glycolysis, Krebs Cycle, Electron Transport System, oxidative phosphorylation, respiratory quotient, Anaerobic- fermentation - Respiratory quotient. Biological nitrogen fixation, nitrogen cycle.	
IV	GROWTH : Growth – plant growth regulators (auxins, gibberellins, cytokinins, ethylene and abscisic acid) and applications. Photo morphogenesis: photoperiodism, vernalization, dormancy and phytochromes. Stress Physiology: Concepts of plant responses to stresses (water, salt, temperature).	
V	PLANT BIOCHEMISTRY: Classification, properties and biological role of carbohydrates, amino acids, proteins and lipids. Enzymes: properties, classification, nomenclature, mode of action and factors influencing enzyme action.	
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)		Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
Recommended Texts	<ol style="list-style-type: none"> 1. Noggle and Fritz. 1976. Introductory Plant Physiology, Prentice Hall, New Delhi. 2. Pandey, SN and Sinha, BK. 1989. CORE XV - PRACTICAL COVERING – CORE XIV, XV AND XVI - PRACTICAL-VII

Title of the Course		PRACTICAL - VI - PLANT ECOLOGY, PHYTOGEOGRAPHY, PLANT PHYSIOLOGY AND PLANT BIOCHEMISTRY					
Paper Number		CORE XV					
Category	Core	Year	III	Credits	3	Course Code	23UBT15P
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		2		-		3	5
Pre-requisite		Practicals pertaining to above subjects is important to get knowledge on various physiological functions of plants.					
Learning Objectives							
C1		To study morphological and anatomical adaptations of plants of various habitats.					
C2		To demonstrate techniques of plant tissue culture.					
C3		To familiarize with the structure of DNA, RNA.					
C4		To carryout experiments related with plant physiology.					
C5		To perform biochemistry experiments.					
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Relate to the distribution and adaptions of plants pertaining to their habitat					K1		
2. Demonstrate skills in green planning and callus culture.					K2		
3. Elucidate the basic principles involved in the plant physiology and biochemistry experiments.					K3		
4. Appreciate the structure and functions of DNA and RNA.					K4		
5. Estimate the biochemical components and determine the factors controlling photosynthesis and transpiration of plants.					K5		
EXPERIMENTS							
Plant Ecology and Phytogeography							
1. Study of morphological and anatomical adaptations of locally available hydrophytes, xerophytes, mesophytes and halophytes and correlate to their particular habitats.							
Hydrophytes : <i>Nymphaea</i> , <i>Hydrilla</i>							
Xerophytes : <i>Nerium</i> , <i>Casuarina</i>							
Mesophytes : <i>Tridax</i> , <i>Acalypha</i>							
Halophytes : <i>Avicennia</i> , <i>Rhizophora</i>							
Epiphytes : <i>Vanda</i> , <i>Bulbophyllum</i>							

2. Map of the phytogeographical regions of India. 3. Quadrature study and line transect. 4. Plan for a green building. Field trip to any one scrub jungle or wetland (Guindy National park/Nanmangalam Scrub jungle/Pallikaranai Marsh/Siruthavur Scrub/Vedanthangal Bird Sanctuary/Kelampakkam Marsh/Adyar Poonga).	
Plant Physiology and Plant Biochemistry 1. Determination of water potential by plasmolytic method. 2. Effect of chemicals on membrane permeability. 3. Effect of environmental factors on rate of transpiration by gravimetric method. 4. Separation of plant pigments by paper chromatography. 5. Study the rate of photosynthesis under different light intensities by using Willmott's bubble counter. 6. Study of rate of photosynthesis under different wavelengths (red & blue) of light. 7. Measurement of pH of expressed cell sap and different soils using pH meter. 8. Biochemical test for carbohydrates, proteins and lipids	
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)

DISCIPLINE SPECIFIC ELECTIVE - III**HORTICULTURE**

Title of the Course		DISCIPILNE SPECIFIC ELETIVE- III - HORTICULTURE					
Paper Number		Elective-III					
Category	Elective	Year	III	Credits	3	Course Code	23UBTE3A
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total
		3		1		-	4
Pre-requisite		Students should know fundamental knowledge on horticulture applications.					
Learning Objectives							
C1	To gain an understanding of the fundamentals of horticulture and techniques needed to grow and maintain plants.						
C2	To develop skills in students to work as gardeners, therapists, designers, growers and technical advisors in the food and non-food sectors of horticulture.						
C3	To know about hydroponic culture.						
C4	To develop the various horticultural crop protection.						
C5	To impart the knowledge on market preparation.						
Course outcomes:					Programme Outcomes		
On completion of this course, the students will be able to: CO							
1. Enumerate the concepts in horticulture and nursery management.					K1		
2. Demonstrate a working knowledge on biology of soil, compost making, designing and planning of garden, pest, diseases and nutrient management practices.					K2		
3. Appraise the importance of floriculture and evaluate the contribution of spices and condiments on economy.					K3		
4. Analyze different methods of weed control in horticultural crops.					K4		
5. Develop their competency on pre and post-harvest technology in horticultural crops.					K5 & K6		
UNIT		CONTENTS					
I	Importance and scope of horticulture. Classification of horticultural crops –fruits and vegetables. Essentials of nursery Management - Soil management: Garden soil, Physical and chemical properties of soil, Cultural practices of irrigation management, Mulching, Nursery, greenhouses.						

II	Hydroponic culture, types of container. Use of Organic matter, Compost, manures, and fertilizers in horticultural crops. Principles of organic farming. Environmental factors influencing vegetable and fruit production.
III	Horticultural crop protection; physical control - pruning. Chemical control- pesticides, fungicides. Plant propagation - cutting, layering, budding, grafting. Types of gardens: formal, informal, kitchen and Terrace. Indoor gardening-bottle garden. Floriculture, ornamental gardening.
IV	A brief account of annual, biennials and perennials with reference to ornamental gardens. Green house, terrarium, water garden, rockery plants, bonsai techniques. Landscaping design - principles and basic components.
V	Technology of horticultural crops: harvesting, handling, packaging, marketing, transport, storage and preservation. Economics of horticultural Crops: Cardamom, pepper, clove. Food processing - freezing, bottling, canning, drying and chemical preservation.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

DISCIPLINE SPECIFIC ELECTIVE-III
COMPUTER APPLICATIONS IN BOTANY

Title of the Course		DISCIPLINE SPECIFIC ELECTIVE - III COMPUTER APPLICATION BOTANY					
Paper Number		Elective-III					
Category	Elective	Year	III	Credits	3	Course Code	23UBTE4B
		Semester	VI				
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		To equip students with computational skills for drug design.					
Learning Objectives							
C1	To familiarize the student with the fundamentals concepts of bioinformatics.						
C2	To equip students with computational skills for drug design.						
C3	To learn about the bioinformatics database, data format and data retrieval from online sources.						
C4	To develop interdisciplinary skills in using computers in botany to learn about the biological database.						
C5	Student is aware with the most recent technologies for sequencing and bioinformatics analysis and is able to apply them to the structural and functional genomics of plants.						
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Recognize advanced resources for accessing scholarly literature from the internet.					K1		
2. Explain the concept of databases and use of different public domain for DNA and proteins sequence retrieval.					K2		
3. Apply various software resources with advanced functions to carry out analysis of data procured through research.					K3		
4. Decipher the effective utilization of bibliography management software while typing and downloading citations.					K4		
5. Determine how the knowledge gained can be used for designing experiments and data interpretation.					K5 & K6		
UNIT	CONTENTS						
I	Introduction to computers and Bioinformatics. Introduction to Computers – classification, computer generation, low, medium and high level languages, software and hardware, operating systems personal, mini, main frame and super computers, characteristics and application, computer memory and its types, data representation and storage. Microsoft excel, data entry, graphs, aggregate functions,						

	formulas and functions, number systems, conversion devices, secondary storage media
II	Biological Research on the web: Using search engines, finding scientific articles. Fundamentals of networking, internet, intranet, search engines- yahoo, Google, etc. telnet, ftp.
III	Computer fundamentals - programming languages in bioinformatics, role of supercomputers in biology. Historical background. Scope of bioinformatics - Genomics, Transcriptomics, Proteomics, Metabolomics, Molecular Phylogeny, computer aided Drug Design (structure based and ligand based approaches), Systems Biology and Functional Biology. Applications and Limitations of bioinformatics.
IV	Introduction to databases. Biological databases- NCBI, EMBL and DDBJ. Data Generation and Data Retrieval Generation of data (Gene sequencing, Protein sequencing, Mass spectrometry, Microarray), Sequence submission tools (BankIt, Sequin, Webin); Sequence file format (flat file, FASTA, GCG, EMBL, Clustal, Phylip, Swiss-Prot); Sequence annotation; Data retrieval systems (SRS, Entrez) DNA sequencing methods. protein sequencing Phylogenetic analysis Similarity, identity and homology, Alignment – local and global alignment, pairwise and multiple sequence alignments, alignment algorithms. Methods of Alignment (Dot matrix, Dynamic Programming, BLAST and FASTA); Phylogenetic analysis: Construction of phylogenetic tree, dendrograms, methods of construction of phylogenetic trees.
V	Application of Taxonomic Software for preparation of Dichotomous Key. Phylogenetic analysis. Make line drawing of Plants for description. Usage of plant identification apps on android phones. Computer application in biostatistics - MS Excel and SPSS. Computer Aided Designing (CAD) for outdoor and indoor Landscaping. Exposure to CAD (Computer Aided Designing). Artificial intelligence in biology (AI).
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course	Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total	
		3		1	-	4	
Pre-requisite		To provide an insight into the principles of nanotechnolgoy in biological and medical research.					
Learning Objectives							
C1	To provide students with comprehensive knowledge of basics in nanotechnology.						
C2	To enable the students understand and appreciate the various applications of nanoparticles.						
C3	To give perspective to researchers and students who are interested in nanoscale physical and biological systems and their applications in medicine.						
C4	To introduce the concepts in nanomaterials and their use with biocomponents to synthesize and interact with larger systems.						
C5	To impart knowledge on the most recent molecular diagnostic and therapeutic tools used to treat various diseases.						
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes		
1. Relate to the essential features of biology and nanotechnology that are converging to create the new area of bionanotechnology					K1		
2. Explain the synthesis of nanomaterials and their applications.					K2		
3. Apply the knowledge gained to develop nanomaterials					K3		
4. Compare the advantages and disadvantages of nanoparticles in health, medicine and environment.					K4		
5. Construct various types of nanomaterial for application and evaluate the impact on environment.					K5 & K6		
UNIT	CONTENTS						
I	INTRODUCTION TO NANOTECHNOLOGY: History, Concepts, Prospects and Challenges. Scope of nanotechnology in Indian and global perspectives. Definition - Nanoscience, Nanotechnology. Classification based on the dimensionality- basic understanding of 1D, 2D and 3D nanostructures. Overview of nanoparticles, nanoclusters - nanotubes, nanowires and nanodots. Biotemplates – DNA to build nanocubes and hinges – smart glue, DNA as wire						

	template.
II	SYNTHESIS OF NANOPARTICLES: Synthesis of nanoparticles - Top down and bottom up approach. Methods of synthesis: Physical, Chemical reduction – reducing agents, capping agents, stabilizing of nanoparticles and Biological – Novel synthetic methods using plant extracts, bacteria and fungi.
III	FOREST UTILIZATION AND WOOD TECHNOLOGY: Properties and characterization of nanoparticles: Nano size effects - optical, electrical, mechanical, magnetic and catalytic activity. Characterization of nanoparticles using UV-Visible spectroscopy, SEM, TEM, Atomic force microscopy, Scanning tunnel microscopy, NMR, X-ray Crystallography and Photoluminescence.
IV	NANOCARRIERS: Introduction. Nanocarriers for drug delivery (DDS) – Polymeric nanotubes and solid lipid nanoparticles (SLN) as carriers, controlled release, site specific targeting. Magnetic nanoparticles as drug carriers and its applications.
V	APPLICATIONS OF NANOPARTICLES: Textiles, Food industry - nutraceutical, Medicine - antimicrobial activity, wound healing and dressing; Environment – green manufacturing. Agriculture - nanofertilizers and nanopesticides. Smart biosensors – Components and its application
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)	
Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC /others to be solved (To be discussed during the Tutorial hour)	
Skills acquired from this course	
Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill

DISCIPLINE SPECIFIC ELECTIVE - IV**FORENSIC BOTANY**

Title of the Course		DISCIPILNE SPECIFIC ELETIVE- 1V - FORENSIC BOTANY						
Paper Number		Elective-IV						
Category	Elective	Year	III	Credits	3	Course Code	23UBTE4B	
		Semester	VI					
Instructional Hours per week		Lecture		Tutorial		Lab Practice	Total	
		3		1		-	4	
Pre-requisite		The course will provide basic knowledge about the application of Botany to Forensic investigations and legal disputes.						
Learning Objectives								
C1	The provide basic knowledge about the application of Botany to Forensic investigations and legal disputes.							
C2	To provide students with knowledge of palynology, dendrology, plant anatomy, pharmacognosy, molecular biology and toxic compounds from plants that could serve as leads in crime spots.							
C3	To learn classification of plants from forensic point of view.							
C4	To understand forensic importance of different parts of plants.							
C5	To develop and identify main morphological and anatomical features of plants, which could be useful for forensic investigations.							
Course outcomes: On completion of this course, the students will be able to: CO						Programme Outcomes		
1. Recognize morphological and anatomical features of plants, which could be useful for forensic investigations.						K1		
2. Summarize the forensic importance of different parts of plants.						K2		
3. Apply techniques for the collection and preserve of botanical evidences of crime.						K3		
4. Analyze and decipher the significance of classic and DNA based forensic botany cases.						K4		
5. Interpret and deduce new methods for the detection of plant poisons used in crime.						K5 & K6		
UNIT	CONTENTS							
I	General plant classification schemes, Sub specialization of forensic botany- plant morphology, plant anatomy, plant systematic, palynology, plant ecology, limnology, Plant architecture- roots, stems, flowers, leaves. Practical plant classification schemes: vegetables and herbs, fruits bearing trees and plants, landscaping plants: trees, shrubs and vines, grasses, plant cell structure and functions.							

II	Various types of woods, timbers, seeds and leaves and their forensic importance, Identification and matching of various types of wood, timber varieties, seeds and leaves. Types of fibers – forensic aspects of fiber examinations, Identification and comparison of man-made and natural fibres. Various types of planktons and diatoms and their forensic importance. Study and identification of pollen grains, Identification of starch grains, powder and stains of spices etc. Paper and Paper Pulp identification.
III	Various types of poisonous plants: <i>Abrus precatorius</i> , <i>Aconitum napellus</i> , <i>Anacardium occidentale</i> , <i>Argemone mexicana</i> , <i>Cannabis sativa</i> , <i>Claviceps purpuria</i> , <i>Croton tiglium</i> , <i>Atropa belladonna</i> , <i>Gloriosa superba</i> , <i>Jatropha curcas</i> , <i>Lathyrus sativus</i> , <i>Nerium indicum</i> , <i>Nicotiana tabacum</i> , <i>Strychnos nux-vomica</i> , <i>Thevetia nerifolia</i> . Types of plants yielding drugs of abuse – opium, cannabis, coco, tobacco, datura, <i>Psilocybin</i> mushrooms.
IV	Collection and preservation of botanical evidences (Sawdust, roots, seeds, pollen, diatoms etc.) - documentation, preservation, tools and digital outdoor crime scene consideration. Importance of botanical evidences - applications of forensic botany.
V	Analysis of samples- DNA analysis. Classic forensic botany cases: Case histories by using Plant anatomy and systematic, Palynology, Plant ecology, Limnology, Plant Molecular Biology, plant genetic engineering, Drug enforcement and DNA.
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)

SKILL ENHANCEMENT COURSES SEC VII
***ENTREPRENEURIAL SKILL**

ENTREPRENEURIAL OPPORTUNITIES IN BOTANY

Title of the Course		SKILL ENHANCEMENT COURSE SEC VII – NAAN MUTHALVAN V ENTREPRENEURIAL OPPORTUNITIES IN BOTANY				
Paper Number		Skill Enhancement-VII				
Category	Elective	Year	III	Credits	1	CourseCode 23UBTNMC5
		Semester	VI			
Instructional Hours per week		Lecture		Tutorial	Lab Practice	Total
		1		-	-	1
Pre-requisite		To understand the concept of Entrepreneurial Opportunities in Botany.				
C1	To enable students to understand about establishment of various ventures after graduates in Botany using medicinal plants, Biotechniques and marketing of bioproducts.					
C2	To create a mindset among students to start their own companies for income generation.					
C3	The students may understand about various fields of botany.					
C4	To develop the concept of Entrepreneurial Opportunities in Botany.					
C5	Describe the new strategies to describe marketing and business management strategy.					
Course outcomes: On completion of this course, the students will be able to: CO					Programme Outcomes	
1. Relate to how various fields of botany could be understood with an entrepreneurial approach.					K1	
2. Explain the concept of Entrepreneurial Opportunities in Botany.					K2	
3. Make of the knowledge gained to start new venture using Plant tissue culture and plant products for commercial exploitations					K3	
4. Decipher effective ways of making bioproducts like organic acids, solvents, beverages, enzymes, antibiotics, mushrooms, biogas and etc.					K4	
5. Develop new strategies to describe marketing and business management strategy including the role of IPR and bioethics regulations for licensing.					K5 & K6	
UNIT	CONTENTS					
I	INTRODUCTION TO ENTREPRENEURSHIP Introduction to Entrepreneurship, Scope and identification of new ventures using plant resources, Mechanism of product selection and commercialization, General concept about the Govt. formalities, rules & regulation, Entrepreneurship skill development.					

II	TOOLS AND TECHNIQUES Production of commercially viable plants through Plant tissue culture technique, Production of secondary metabolites, solvents, organic acids, beverages, enzymes, antibiotics.	
III	NEW VENTURE CREATION Production of Biofertilizers, Vermicompost, Establishment of medicinal, herbal and zodiac gardens, Terrace & Kitchen garden, Spirulina and Azolla cultivation, Mushroom cultivation, Bonsai, Bouquet making, Terrarium.	
IV	PRODUCT DEVELOPMENT AND COMMERCIALIZATION Product commercialization and business strategy, Dyes, Cosmetics and Perfumes, Gums, Resins & Latex, Areca Leaf Plates, cups & bags, Jute Products.	
V	BIO-BUSINESS PLANS, IPR AND BIOETHICS Marketing and Business management strategy, Bank loan, Intellectual property rights, Patent laws - Bioethics and current legal issues, Marketing and public perceptions in product development – Technology licensing and branding concerns.	
Extended Professional Component (is a part of internal component only, Not to be included in the External Examination question paper)		Questions related to the above topics, from various competitive examinations UPSC / TRB / NET / UGC – CSIR / GATE / TNPSC / others to be solved (To be discussed during the Tutorial hour)
Skills acquired from this course		Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill
